

Installation Instructions for CoolSim 3.1.0

1. Download the file **CoolSim 3.1.0__Setup.exe** to the desktop or to a temporary folder on your computer.
2. If you are running Windows XP or if you are running Vista and are doing the installation as “admin”, proceed to Step 3. If you are running Vista and are doing the installation as a User, proceed to Step 6.
3. Double-click on the **CoolSim 3.1.0__Setup.exe** icon to launch the installation wizard. When the installation is complete, a shortcut will appear on your desktop.
4. Before you run CoolSim 3.1, you may wish to alter the properties associated with the shortcut. In particular, you can change the “Start in” folder to correspond to the area on your computer where you would like your CoolSim files to be stored. Often, this is a folder in the Users area, but it need not be.
5. Start CoolSim by double-clicking on the shortcut icon. You will have a choice of running CoolSim off-line or on-line. If you choose to run on-line, you will need to enter your RSF username and password before the software will start.
6. Continuing from Step 2 for Vista users installing as a User, right-click on the **CoolSim 3.1.0__Setup.exe** icon and select the “Run as administrator” option.
7. Follow the installation wizard until the installation is complete.
8. Navigate to the folder where CoolSim 3.1.0 was installed. If you did not change the default location, this folder will be:

C:\Program Files\Applied Math Modeling Inc\

9. Right-click on the folder name CoolSim 3.1.0 and select Properties.
10. Choose the Security tab and click on Edit...
11. Under “Group or user names”, choose Users – or choose one or more individual users.
12. Click on Allow for Full Control. Click on Apply and then OK.
13. You will now be able to run CoolSim by double-clicking on the CoolSim shortcut icon on the desktop. Prior to running, you may wish to alter the properties associated with the shortcut. In particular, you can change the “Start in” folder to correspond to the area on your computer where you would like your CoolSim files to be stored. Often, this is a folder in the Users area, but it need not be. When CoolSim starts, you will have a choice of running CoolSim off-line or on-line. If you choose to run on-line, you will need to enter your RSF username and password before the software will start.
